

COVID-19 Response Framework: Keeping Ontario Safe and Open

November 3, 2020

Ontario's Priorities

Limit the Transmission of COVID-19

Put measures in place that work to limit transmission and sickness, and prevent death.

Avoid Closures

Enable businesses to sustain operations while reducing the risk of transmission.

Keep Schools and Childcare Open

Enable schools across the province to sustain a safe environment for classroom learning.

Maintain Health Care and Public Health System Capacity

Ensure the health care and public health system are meeting the needs of their communities.

Protect Vulnerable Populations

Put measures in place to protect those most vulnerable to COVID-19.

Provide Additional Supports Where Possible

Develop equitable responses, including financial tools for groups and sectors disproportionately affected by the pandemic.

Key Risk Factors of Potential Transmission

There are several risk factors that help drive transmission of COVID-19. ***Close contact is the highest risk.*** Limiting these risks is critical to keeping Ontario open and safe.

Personal and public health measures — such as physical distancing, staying home when ill even with mild symptoms, frequent handwashing and surface cleaning — have significant benefits and have been proven to limit COVID-19 transmission.

It is critical the people of Ontario understand the risks of gatherings (crowds) in close contact in enclosed/indoor spaces to understand how to mitigate those and make informed choices.

Principles for Keeping Ontario Safe and Open

Responsible: Protecting the **health and safety of the people of Ontario**, especially those who are most vulnerable. Keeping child care centres and schools open are priorities.

Proactive, graduated, and responsive: Proactive measures, including enforcement, will work to prevent transmission, thereby protecting our health care system and helping businesses stay open. **Graduated measures should be targeted and informed by regional circumstances.**

Evidence-informed: Best-available scientific knowledge, public health data, defined criteria and consistent measures will inform public health advice and government decisions.

Clear: Plans and responsibilities for individuals, businesses and organizations (employers) will **be clear and outline what happens at each level.**

Outbreaks and Community Transmission

Outbreaks can start in a variety of places including workplaces, institutions, and other settings.

When there are a few or small number of outbreaks, public health units can undertake aggressive outbreak management, **at each setting**, to contain virus spread.

This may include rapid case and contact management, enforcement of measures, and strengthening measures where the outbreak is occurring, etc.

If spread of the virus is not contained, it often results in **widespread community transmission**.

Widespread community transmission requires **broader scale responses**. A response would include broad scale public health measures, restrictions to limiting/restricting access to control transmission, as well as testing, and case and contact tracing.

Community transmission can result in further outbreaks, including in vulnerable settings.

When this occurs, targeted actions, particularly in vulnerable settings such as long-term care homes, retirement homes, child care centres and schools, are required to prevent illness and death.

These outbreaks can also lead to further community transmission.

A Comprehensive, Whole-of-Government Response to Keeping Ontario Safe and Open

Actions and sustained efforts to limiting transmission and moving regions out of modified Stage 2...

Case and Contact Management	<ul style="list-style-type: none">• Almost 4,000 case management and contact tracing staff province-wide undertake outreach to support isolation and testing to prevent further spread• Established target = 90% of cases and contacts followed up within 24 hours
Testing	<ul style="list-style-type: none">• Capacity to process over 50,000 tests/day; building to capacity of 100,000 tests/day by December 2020.• Established target of 60% of tests turned around within 1 day, and 80% within 2 days• Established benchmark of maintaining test positivity under 3%
Public Health Measures	<ul style="list-style-type: none">• Framework to progressively adjust public health measures to respond to the pandemic
Education, Compliance & Enforcement	<ul style="list-style-type: none">• Proactive education and outreach to businesses and organizations• Compliance checks, inspection, paired with education; monitoring, and Provincial Offences Act (POA) Part I or related tools to improve outcomes (e.g., warnings and fines)• Multi-ministry COVID-19 safety blitzes coordinated with local by-law and police services<ul style="list-style-type: none">○ Includes fines and prosecution for blatant and/or repeated non-compliance; results shared with local officials and media, POA Part III or related tools (e.g., appear before court, potential for significant fine and/or jail time)
Targeted Supports	<ul style="list-style-type: none">• Additional supports provided for vulnerable populations, communities, and impacted businesses
Communications	<ul style="list-style-type: none">• Complementary communications plan supporting broad public education and awareness

Framework: Adjusting and Tightening Public Health Measures

Act earlier by implementing measures to protect public health and prevent closures

Gradually loosen measures as trends in public health indicators improve

Objective

PREVENT
(Standard Measures)

PROTECT
(Strengthened Measures)

RESTRICT
(Intermediate Measures)

CONTROL
(Stringent Measures)

LOCKDOWN
(Maximum Measures)

Tactics

Focus on education and awareness of public health and workplace safety measures in place.

Restrictions reflect broadest allowance of activities in Stage 3 absent a widely available vaccine or treatment.

Highest risk settings remain closed.

Enhanced targeted enforcement, fines, and enhanced education to limit further transmission.

Apply public health measures in high risk settings.

Implement enhanced measures, restrictions, and enforcement avoiding any closures.

Implement broader-scale measures and restrictions, across multiple sectors, to control transmission (Return to modified Stage 2).

Restrictions are the most severe available before widescale business or organizational closure.

Implement widescale measures and restrictions, including closures, to halt or interrupt transmission (Return to modified Stage 1 or pre-Stage 1).

Consider declaration of emergency.

Framework: Adjusting and Tightening Public Health Measures

- The goal is to have every public health unit region in the “Prevent” level.
- Framework is designed to ‘stack’ or ‘ladder down or up.’
- Measures are scaled back or implemented progressively, level by level.
- If trends are improving, measures are dropped cautiously, level by level, to ensure there are no significant community or public health impacts with the rollback of measures.

Indicators: Adjusting and Tightening Public Health Measures

 PREVENT (Standard Measures)	 PROTECT (Strengthened Measures)	 RESTRICT (Intermediate Measures)	 CONTROL (Stringent Measures)	 LOCKDOWN (Maximum Measures)
<p>Epidemiology</p> <ul style="list-style-type: none"> Weekly incidence rate is < 10 per 100,000 % positivity is < 1 Ro < 1 Outbreak trends/ observations Level of community transmission/non-epi linked cases stable <p>Health System Capacity</p> <ul style="list-style-type: none"> Hospital and ICU capacity adequate <p>PH System Capacity</p> <ul style="list-style-type: none"> Case and contact follow up within 24 hours adequate 	<p>Epidemiology</p> <ul style="list-style-type: none"> Weekly incidence rate is 10 to 39.9 per 100,000 % positivity is 1-2.5% Ro is approximately 1 Repeated outbreaks in multiple sectors/settings OR increasing/# of large outbreaks Level of community transmission/non-epi linked cases stable or increasing <p>Health System Capacity</p> <ul style="list-style-type: none"> Hospital and ICU capacity adequate <p>PH System Capacity</p> <ul style="list-style-type: none"> Case and contact follow up within 24 hours adequate 	<p>Epidemiology</p> <ul style="list-style-type: none"> Weekly incidence rate is 40 to 99.9 per 100,000 % positivity is 2.5-9.9% Ro is approximately 1 to 1.2 Repeated outbreaks in multiple sectors/settings, increasing/# of large outbreaks Level of community transmission/non-epi linked cases stable or increasing <p>Health System Capacity</p> <ul style="list-style-type: none"> Hospital and ICU capacity adequate or occupancy increasing <p>PH System Capacity</p> <ul style="list-style-type: none"> Case and contact follow up within 24 hours adequate or at risk of becoming overwhelmed 	<p>Epidemiology</p> <ul style="list-style-type: none"> Weekly incidence rate \geq 100 per 100,000 % positivity \geq 10% Ro \geq 1.2 Repeated outbreaks in multiple sectors/settings, increasing/# of large outbreaks Level of community transmission/non-epi linked cases increasing <p>Health System Capacity</p> <ul style="list-style-type: none"> Hospital and ICU capacity at risk of being overwhelmed <p>PH System Capacity</p> <ul style="list-style-type: none"> Public health unit capacity for case and contact management at risk or overwhelmed 	<p>Trends continue to worsen after measures from Control level are implemented.</p>

NOTES:

- Indicators will generally be assessed based on the previous two weeks of information. However, movement to apply measures will be considered sooner than two weeks if there is a rapidly worsening trend.
- Local context and conditions will inform movement, including potential regional application of measures.
- Thresholds within a region may not all be met at the same time; decisions about moving to new measures will require overall risk assessment by government.

Proposed* Classification of Public Health Unit Regions
